

Percussion press HP 200-FE

Article-Nr.: HP 200-FE (ref.760013)

paint : White

| Technical data | HP 200 FE |
|-------------------------|-------------------|
| Distance table-spindle | 35-170 mm |
| distance spindle-column | 75 mm |
| spindle bore | 10H7 |
| bore inside base | 20 mm |
| table dimensions | 80x120 mm |
| travel | 60 mm |
| total height | 500 mm |
| pressure power * | 5.5 kN |
| power transmission | spring percussion |
| weight | 20,0 kg |

Functioning :

after the lever actiioning, the axis with the previously installed tool sinks and presses against the workpiece. in so doing the unit's striking pin spring is tightened and thus is mechanical energy stored. after reaching a predetermined travel, a trigger via the striking pin releases the stored energy transmitting it to the workpiece. the percussion force can be set continuously through the star-shaped handle. with various strong springs you have a wide range of use at hand.
